Purpose

The purpose of these workshops is for the Energy Commission to receive comments on the information in *The Comprehensive Energy Efficiency Program for Existing Buildings Draft Action Plan* with stakeholders. Staff will present information from *The Comprehensive Energy Efficiency Program for Existing Buildings Draft Action Plan* and will seek input concerning the merits of the strategies and initiatives within. The information received through the public workshops and subsequent comment periods will be considered in final delivery of *The Comprehensive Energy Efficiency Program for Existing Buildings Action Plan* to be considered for adoption by the Energy Commission in fall 2013.

Background

In 2009, AB 758 was enacted, authorizing the first program in the country to address the energy efficiency of existing buildings at the state level. The Energy Commission, a leader in building energy efficiency standards, is now poised to address the substantial energy savings opportunity in California's existing buildings.

Energy Commission staff published the *Comprehensive Energy Efficiency Program for Existing Buildings Scoping Report* in August 2012, and held workshops in October 2012, to receive feedback on the report. Staff incorporated this feedback and other stakeholder input into the *Comprehensive Energy Efficiency Program for Existing Buildings Draft Action Plan*. Staff will incorporate feedback received at these workshops into the final Action Plan.
